Файлы, сгенерированные инструментом:

## 19.Maltego

При использовании инструмента Maltego были сформированы графы с различной информацией о riotgames. Поиск с использованием Company Stalker дал несколько документов (оф. Отчеты и документы о событиях LoL) и почт, связанных с riotgames.

Среди найденных почт многие уже были найдены другими инструментами либо не несут полезной информации. Из новых - Rodrigo Magno – Network Engineer.

Поиск с использованием Footprint дал различные DNS имена, домены, ip адреса и названия компаний, связанных с riotgames.

Поиск информации о сети и домена по url не дал полезных результатов.

Собранные данные могут быть использованы для проведения фишинговую атаки.

Все почты интересующих сотрудников были проверены на утечки с помощью инструмента <https://haveibeenpwned.com>:

Все найденные почты сотрудников были слиты, поэтому может быть целесообразна покупка слитых БД для доступа к этим почтам и проведения атаки на Riot Games.

## **Заключение**

Самыми много обещающимися целями являются Matthew Drake и Samuel Loretan, поскольку:

1. про них известны слитые личные почты, получив доступ к которым, можно найти новую полезную информацию для проведения атаки;
2. наличие большого числа (по сравнению с другими кандидатами) страниц соцсетей, что делает возможным сбор информации о близких людях цели с целью поиска вектора атаки.
